AIGS

To Whom it may concern,

This letter services to inform the reader that Consulta has been working with AIGS as the representative of Yellowfin in South Africa, and the local team for more than 18 months. Their administration, support, and consulting around the YellowFin BI stack has been exceptional. In our process to appoint a local solutions and technology provider it was important for us to deal with a local representative and have access to local support, backed up by the principal vendor and in our dealings with AIGS this has been the case.

Consulta started engaging with AIGS/Yellowfin in 2017 on an evaluation basis and was appointed as a Yellowfin ISV in 2018. Since then we have been working closely with the local team and the AIGS team as assisted us in various projects. In addition to the official support and training provided they have gone above and beyond to support and assist our team with any of our requests and projects to date. Because of their assistance and exceptional and professional behavior we have created and implemented many successful projects and solutions.

Their software expertise coupled with the collaborative and innovative spirit made them our go-to experts for our Yellowfin-based projects. In their actions with us, they were detail-oriented, organized, and always open to constructive feedback, making our business relationship both effortless and pleasant.

I recommend AIGS and the local team for any engagement related to the Yellowfin product stack and in dealing commercially with them as the distributor of Yellowfin in their region.

If you have any further questions, please feel free to contact me.

Regards,

JJG ELS
